Defense Tech and Advocacy Delegation to Europe February-March 2026

Brussels, Belgium – January 11, 2026 — [Defense Tech for Ukraine](#) (DTU), an international nonprofit promoting defense-tech support for Ukraine, together with [European Action for Ukraine](#) (EAU), a grassroots nonprofit focused on European advocacy, today announce a joint delegation to Germany, France and Brussels in February–March 2026.

The mission of the delegation is twofold:

- **Advance Defense-Tech Cooperation:** Through DTU, the delegation will promote the adoption, development, and deployment of critical defense-technology solutions — including dual-use, drone, electronic-warfare, and other emerging technologies — connecting European industry, policymakers, and defenders with Ukraine’s tech talent and wartime innovation experience.
- **Strengthen Civic Advocacy:** The delegation aims to unify efforts of citizens, NGOs, diaspora groups, and grassroots volunteers — enabling coordinated advocacy for Ukraine’s defense. By engaging with lawmakers across key European capitals and institutions, EAU seeks to maintain and expand political support for Ukraine’s security and defense needs.

During the visit, the delegation will facilitate meetings and workshops with pro-Ukraine organizers, community leaders, activists, and lawmakers. Engagements are planned with the German Bundestag, the French Assemblée Nationale and Senate, and members of the European Parliament in Brussels. The delegation will include representatives from Germany, the UK, France, Slovakia, Belgium, Canada, and the U.S. Key scheduled events include:

- Germany — February 10–28 (including the [Munich Security Conference](#) and [Café Kyiv](#) conference in Berlin). Bundestag members and officials.
- France — March 1-7 Assemblée nationale members and officials.
- Belgium — March 8–17 ([EDF Info Days](#)) and March 12–14 ([BEDEX events](#))

DTU and EAU believe that combining defense-tech initiatives and civic advocacy presents a powerful opportunity to sustain and deepen European support for Ukraine — through both defense capability building and political advocacy.
